

SHORT AND SWEET

My True Story

A MIRACLE HEALING.

by Grace Weston

In November 2014, healer Matthew Lennon saved my life. A doctor recommended Matthew to my mum, saying that if Matthew couldn't help me, no one could. I was carried into his clinic weighing six stone and freezing with the cold. Patients in the clinic gave me their slots, as they felt I wouldn't survive the night.

I had been diagnosed with kidney disease, liver failure, blockages on my heart, thyroid and lung problems, Lyme Disease, eight infections, and lastly, a large lump on my right breast! I had been given up by the medics after eleven years of treatment and sent home to die.

A professor told me that my thyroid was shutting down my organs and he consulted with a respiratory consultant in a famous Dublin clinic to support my treatment. The consultant told me I was on a maintenance programme to try and give

me the best quality of life that they could offer for the remainder of my life – which appeared as though it would be short.

“Ten months later, I came on in the Laois Senior County Final ... which we won.”

When I went into Matthew, he told me my life force was very low. He asked me a lot of questions and he appeared to make his own diagnosis of my situation. He treated me as often as he could, and ten months later, I came on in the Laois Senior County Final ... which we won. I am now back to fitness and enjoying life!
